

Product Specifications

Kimberley Limestone

Tiles, Cladding and Pavers

Tuscan Beige

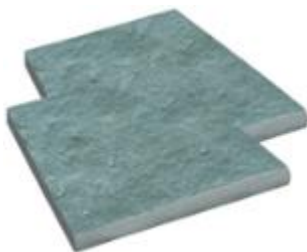

Tuscan Beige is an extremely dense Limestone with magnificent urban colours.

Ideal for pool copings Tuscan Beige offers the hardness of granite, yet with beautiful variation and appearance.

Versatile in its cosmetics too, leave the stone natural (pictured middle above) or seal it to enhance the colour and add a shine (pictured left and right above).

And, with the flexibility of being available in tiles, random and striated walling, it offers a spectacular, versatile stone for a fully integrated indoor-outdoor living space, where the tones are warm and neutral and the textural and colour contrast are crisp and clean.

Blue Limestone

Tuscan Blue is an extremely dense Limestone with blue-light grey tones.

Ideal for all uses, especially in heavy traffic areas, Tuscan Blue offers an appealing modern colour for an unpretentious design influence.

With a wonderfully welcoming yet sophisticated ambience, this robust yet refined natural stone is the timeless choice that's perfectly suited to a myriad

of applications, limited only by the imagination.

And, with a versatility in its cosmetics too, you can leave the stone natural (pictured left and middle above) or seal it to enhance the colour and textures (pictured right above).
